Profile

Between 2022 and 2023 I worked as sole iOS developer at rooom. My responsibilities among others included the communication with Apple through Apple Store Connect, testing and upload apps to TestFlight, creating apps from design storyboards, adding AR and VR features and updating legacy code.

Now, I recently started freelancing but I am open to new job offers.

In January 2020 I finished my two years-long "Umschulung" for Software Developer in Berlin and got certified by the IHK, the German Chamber Of Commerce.
As part of the certification's curriculum, I did a 6 months internship for iOS programming, where I developed a museums iOS app for iPad as my exam project. For the exam, I wrote the documentation and held a 15 min presentation in German.

My specialisation is in programming for iOS, with the UIKit or SwiftUI frameworks using the Swift programming language. Originally I passed my A-Levels in Electronics and Math with full marks and after working in the electronic components testing industry I went back to the university to study foreign languages.
Later in London, I worked in the Apple Travel EMEIA team as a travel consultant providing travel solutions for Apple corporate and retail operations; I collaborated on organising and ticketing travel and accommodation for various events such as the iPhone's and iPad's launch.

After leaving London in May 2014 I took a year-long sabbatical visiting Japan and South-East Asia. During this time, I took the opportunity to improve my photography and web design skills, and volunteer to teach English to disadvantaged children in India. During my career, I acquired the ability to think outside the box, a robust understanding of working with Macs in a networking environment, and the focus to work accurately and meticulously. I speak and write fluent English and have demonstrable knowledge of several European languages such as French, Italian, and German.

Experience
Aerticket, Boppstraße 10, 10967 Berlin October 2016 - September 2017
Chambers Travel, Am Borsigturm 27, 13507 Berlin July 2015 - September 2016
