Skills

iOS Developer for Apple platforms using Swift and the SwiftUI and UIKit frameworks.

About Me

I am always doing my best and challenging myself to progress in my career. Ideally, I like to write code that is easy to understand, easy to maintain and extend, and in line with the Apple design guidelines.

I love to develop native iOS and macOS apps with Swift using UIKit programmatically or with storyboards. Now with SwiftUI, there are great possibilities to develop apps cross-platform for macOS, iPadOS, tvOS, watchOS and even xrOS using a shared codebase. It is exciting.

I like cycling and specialty coffee. Also, I am multilingual and I contributed to localise open source apps in German, French and Italian.
